

Concept Cougar

Because if you've never yet experienced the joys of a cougar, well...

Compact, powerful, and alluring, the Cougar does everything the bigger beasts do, from design work to gaming, thanks to its hot new i5-13600K CPU (one of the most astonishing CPUs on the market today), 32GB RAM, and a fast NVME PCIE 1TB solid state drive.

Graphics-wise, the Cougar pulls no punches, offering the amazing RTX 4060ti Graphics Card with 8GB of dedicated graphics.

Measuring a svelte 11" x 15" x 7.5" (H x W X D), the Cougar perches nicely on any desktop, is carry-on compatible, and yet, unlike other compact designs, utilizes the same full-size components of standard desktops. How we did this is a bit of a minor miracle, if we do say so ourselves, but suffice to say you can run the Cougar at full throttle without her even breaking a sweat, thanks to some innovative cooling and airflow. One of our best creations ever.

Specs and Features

Processor	Intel i5-13600K 5.1GHz
Motherboard	Z690M
RAM	32 GB (exp. to 128GB)
SSD	1TB PCIE M.2 SSD
HDD	Optional
Cooling System	Heatpipe Cooler
Graphics Card	RTX 4060ti Graphics 8GB
Power Supply	650W SFX Power Supply
Keyboard / Mouse	Optional
Chassis	QBX Compact Chassis
Operating System	Windows 11 Pro

Cougar's innovative design packs in a lot of high-spec hardware

TOTAL \$3,247.40

Options

Storage	Upgrade from 1TB SSD to 2TB SSD	\$195
CPU	Upgrade from i5-13600K to i7-13700K	\$205
CPU	Upgrade from i5-13600K to i9-13900K	\$511
Cooling	Upgrade to RGB Liquid Cooling System	\$175
